COMPUTER NETWORKING PROFESSIONAL

Computer Network Professional and Military Veteran, having held a Secret Security Clearance with 6 years of experience, and a proven ability to be a corporate steward, interacting and collaborating with multiple levels of management and diverse cultural audiences. Focused on maintaining high levels of accuracy and efficiency, as well as achieving project implementation and Upper TI (Tactical Internet) infrastructure goals. Acclimatized to risk, responsibility, and operating under pervasive pressure while consistently excelling. Intuitive and highly analytical with knowledge of networking security technologies, architectures, and platforms. Adept at quickly mastering new concepts and has a desire to master the latest technologies. Career supported by a Bachelor of Arts Degree in Criminal Justice, Technical Certifications, Operational Experience, and management of a network in a large educational environment.

- Cisco Administrator
- Troubleshooting
- VoIP
- ESXI | Virtual Machines
- LAN & WAN
- Signal Flow | IP Schemes
- Ethernet Cabling
- Cisco Meraki Admin
- Reporting | Documentation

EDUCATION & CERTIFICATIONS

Bachelor of Science, Network Engineering | In Pursuit | 2028
Cisco Certified Network Associate (CCNA) | 2024
Comptia Security+ | 2026
Server+ | 2026
Comptia A+ | 2025
NITE JNN | Department of the Army
Basics Skills Course | Department of the Army
Advanced Skills Course (*Honors*) | Department of the Army
Leadership & Development Training | Department of the Army
Bachelor of Arts | **GPA: 3.8** | **Criminal Justice** | Lewis University

OVERVIEW OF KEY CONTRIBUTIONS

Technologies & Innovations: Excellent knowledge of networking systems and infrastructure, combined with profound skills in data management and analysis. Solid strategic skills are necessary to plan and control the implementation of new systems. Successful history of resolving complex technical matters with technical solutions.

Management & Control: Experienced in the use of systems as well as setting the organization's IT strategy and defining systems and technologies required for its goals and objectives. Excellent leadership skills in managing a team of specialists and directing projects. Managed risk upon multiple lines to protect assets, property, and equipment valued over \$5M while meeting the expectations of project managers.

Training & Development: Configured VLAN segmentation across two switches in Packet Tracer, isolating guest production and management traffic to improve security. Secured an office and network segmentation lab by designing and configuring a segmented office network with role-based access controls.

PROFESSIONAL EXPERIENCE

School District U-46 | Elgin, IL

12/23/23-04/07/25

Network Engineer | Computer Network Administrator

- As part of a dark fiber network cutover, implemented/assisted in configuring and wiring Cisco Nexus 9k switches in two data centers, ensuring seamless connectivity during the transition.
- Design, implement, troubleshoot, analyze, and maintain the information technology network infrastructure environment. This includes network switching, routing, connectivity, wireless, network security, firewalls, and other related devices
- Experience with a variety of networking technologies (VLANs, OSPF, EIGRP, STP, Port Security, DHCP, Trunks, EtherChannels), infrastructure concepts, practices, and procedures
- Perform a variety of complicated information technology tasks and provide support for escalated trouble tickets
- Identify, research, and resolve technical problems in related fields
- Working knowledge of routing protocols like EIGRP, OSPF
- Provide supplementary/secondary support related to Windows server administration
- Network systems infrastructure design and maintenance
- Respond to and resolve departmental requests and reports regarding information technology network-related infrastructure in a professional, timely, and efficient manner
- Take ownership of network-related infrastructure issues, applying best practices (NIST and ITIL), internal tools, and advanced techniques, exhausting all available resources to resolve before escalation
- Capture accurate, succinct information regarding issues as they occur, using the District's Help Desk system to enhance management processes
- Configured VLAN segmentation across hundreds of devices

United States Army | Fort Bliss, TX

11/19/18–11/18/23

Upper TI Team Lead | Network Communications Systems Specialist

- Led a team of 10+ supervised, installed, operated, and performed field-level maintenance on IP-based high-speed electronic nodal systems integrated network control centers; network management facilities; associated multiplexing and transit cased subscriber interface equipment; Communications Security (COMSEC) devices; and other equipment associated with network nodal operations
- Utilized knowledge and technical expertise on the network that allowed for the Tactical Operation Center to maintain Secure Internet Protocol Network (SIPRnet) services at a 98% uptime link in communications
- Requested by his superiors to troubleshoot and reconfigure the Command Post Node stacks to be able to communicate with the Regional Hub Node
- Direct daily operations of the department, analyzing workflow, establishing priorities, developing standards, and setting deadlines
- Meet with department heads, managers, supervisors, vendors, and others, to solicit cooperation and resolve problems
- Redesigned OSPF topology, cutting convergence time from 45 seconds to under 10, eliminating failover complaints.

SOFT SKILLS AND TECHNICAL SKILLS

- Interpersonal Skills
- Customer Service
- Analytical Thinking
- Meticulous
- Integrity
- Attention to Detail | Critical Thinking
- Mentorship | Training
- Proven Leadership | Team Building
- Cisco Routers and Switches
- SNMP (PacStar) (SolarWinds - Orion)
- DNS & DHCP

- Call Manager (REDCOM) (Cisco)
- Hardening Networks
